

SWEET OIL CERTIFICATIONS & TEST REPORTS

South Africa's Number 1 KN95 and N95 Masks Manufacturer, SWEET OIL (PTY) LIMITED announced on November 05, 2020 that SANAS evaluated its samples using FFP2 specifications in SANS 50149:2003.

The Test Report revealed that the Respirator Masks produced by Sweet Oil passed the following tests:

- Penetration of filter materials tested for Sodium Chloride and Paraffin Oil giving average results of 0.5% and 3.9% for Sodium Chloride and 0.6% and 5.3% for Paraffin Oil for the N95 and KN95 Masks respectively
- Visual Inspection
- Practical Performance
- Finish of Parts
- Total Inward Leakage
- Compatibility to Skin
- Flammability
- Head Harness
- Field of Vision
- Breathing resistance (Average result: 43 tested at inhalation at 30 L/min and 190 tested at 95 L/min).

Sweet Oil also has the following Certifications:

- ISO13485
- CE Mark Registration
- GMP Certified
- SAHPRA Manufacturers Licence

BREAKING NEWS

SOUTH AFRICA'S COVID-19 SECOND WAVE IS HERE

Health minister Dr Zweli Mkhize reported 9,445 new cases on Sunday evening (20 December), and 152 new deaths over the past 24 hours, as the virus continues its second wave of infection. It follows 10,939 new virus cases and 254 more deaths in the country on Saturday, December 19, 2020, the Health Department said.

"As of today, the total number of confirmed #Covid-19 cases is 921,922, the total number of deaths is 24,691 and the total number of recoveries is 793,914", the minister said in a post on social media. "Regrettably, 152 more Covid-19 related deaths have been reported: Eastern Cape 105, Free State 5, Gauteng 1, Kwa-Zulu Natal 8, Mpumalanga 3 and Western Cape 30," he said.

12 BRANDS OF KN95 MASKS FAIL SAFETY TESTS

Meanwhile, while the second wave rages on and vaccines are not yet available in the country, a study conducted by University of Cape Town revealed that 12 brands of KN95 masks being used by thousands of SA Health Workers to protect them from Covid-19 infection have failed safety tests.

DENOSA DEMANDS WITHDRAWAL OF MASKS WHOSE SAFETY ARE NOT DETERMINED

In a related development, following the extremely concerning findings of a study by the University of Cape Town (UCT) on 12 different brands of KN95 masks that are worn by healthcare workers as protection against COVID-19, which found that none of them met the stipulated safety requirements due to poor filtration efficacy and poor seal and filling of the masks, the Democratic Nursing Organisation of South Africa (DENOSA) is demanding immediate withdrawal of all the masks whose safety has not been determined.

Sweet Oil – Your No. 1 Mask Manufacturer in South Africa
